DETAILED ACTION

The indicated allowability of claims 3 and 4 are withdrawn in view of the newly discovered reference(s) to Chen. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "wherein at least one of said retaining portions" in line 18 is unclear as to what retaining portion applicant is referring. Is it the retaining portions of the top seat or top cover?

Perhaps in line 19 of claim 1, "retaining portion" should be --retaining portions--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (US 5,642,849).

With regard to claim 3, Chen discloses a staple gun comprising:

Art Unit: 3721

a magazine (Fig. 4); a top cover (50) on the top seat (40); a fastening latch (53, 54) pivoted with the top cover (50), wherein the top seat (40) is provided with at least two retaining portions (41, 42) for retaining portions of the top cover (51, 52); the fastening latch (53, 54) comprises a moving member (53) and a retaining ring (54) for engaging with the retaining portions (41, 42) of the top seat (40); the retaining portions (41) of the top seat (40) are provided with retaining slot (411) of the top seat (20) for retaining a projection (abutting edge of 511) of the top cover.

With regard to claim 4, Chen discloses a staple gun comprising:

a magazine (Fig. 4); a top cover (50) mounted on the top seat (40); a fastening latch (53, 54) pivoted with the top cover (50), wherein the top seat (40) is provided with at least two retaining portions (42) and two fastening portions (41) and wherein the top cover is provided with two retaining portions (52), two fastening portions (51) and a support (lug) for supporting the fastening latch of the top cover; the fastening latch (53, 54) comprises a moving member (53) and a retaining ring (54) wherein the retaining ring is engaged with the retaining portions (42) of the top seat (40); wherein the fastening portions (41) of the top seat is provided with a fastening slot (411) for engaging a projection (abutting edge of 511) of the top cover.

Allowable Subject Matter

Claims 1-2 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose a staple gun comprising in combination at least one of the retaining portions defining both a retaining slot and for receiving a retaining portion of a top cover and a hooking portion for engaging a retaining ring of a fastening latch.

Art Unit: 3721

Response to Arguments

Applicant's arguments with respect to claims 3 and 4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
